5-AXIS OPEN HOUSE IN PARTNERSHIP WITH

HEIDENHAIN

system 3R

Digital Manufacturing Done Right

Why attend?

- You're considering moving into 5-axis machining
- You want to optimize your current 5-axis applications
- You're exploring how to implement automation in your shop

Join us as we showcase the technologies available today, and how to apply them effectively in real-world manufacturing.

Test drive the HEIDENHAIN TNC7 CNC yourself and experience this intuitive, powerful control.

Experience how Multi-Axis maximizes 5-axis technology with fully integrated automation solutions.

DATE:

Wednesday, May 20
9AM – 4PM
Lunch at Noon

LOCATION:

Multi-Axis Technologies, LLC
1112 4th Ave N.
Kent, WA 98032

Only 50 spots available!

Reserve yours today.

GUHRING

Guhring is a global leader in round shank cutting tools, combining 100+ years of expertise with advanced R&D. With 26 plants, 36 service centers, and worldwide technical support, Guhring delivers high-performance tooling and innovative machining solutions.

[Learn more about Guhring](#)

HEIDENHAIN

Experience cutting-edge CNC controls, precision measurement systems, and digital manufacturing solutions from HEIDENHAIN—engineered to deliver accuracy, reliability, and productivity in the most advanced machining environments.

[Learn more about HEIDENHAIN](#)

HORN, founded in 1969 in Tübingen, Germany, develops world-leading precision cutting tools used across major industries. Horn USA, established in 1997, delivers advanced, application-driven solutions that turn technical ideas into fast, reliable machining results.

[Learn more about HORN](#)

Japan Machine Tools provides new and used CNC lathes, vertical machining centers, bridge mills, and more, backed by strong customer service and technical support, delivering comprehensive manufacturing solutions.

See how innovative workholding and automation systems from Lang Technik simplify setups, boost productivity, and set new standards in machining efficiency.

[Learn more about Lang Technik](#)

The Machinists Institute offers accessible, affordable training for aerospace, manufacturing and automotive careers, providing pre-employment, apprenticeship, professional development, competency tracking, support services and program administration.

[Learn more about The Machinists Institute](#)

Mastercam has led CAD/CAM innovation for 40+ years, powering 450k+ installations worldwide. Driven by a “Challenge Accepted” spirit, we deliver advanced machining solutions, global support, and tools that boost precision, performance, and productivity.

[Learn more about Mastercam](#)

Multi-Axis Technologies brings 55+ years of manufacturing experience, specializing in rapid prototyping, repair, and low-volume, high-mix production with precision machining, DFM support, and CNC programming services.

[Learn more about MultiAxis Technologies](#)

New Vision Machine Tools is a family-owned distributor of CNC and toolroom machinery for metal, composite, and plastics manufacturing, delivering diverse machine solutions with strong service support across the Western U.S.

[Learn more about New Vision Machine Tools](#)

OPEN MIND delivers advanced, CAD-compatible CAM solutions through hyperMILL®, offering innovative 2.5D, 3D, and 5-axis strategies that boost programming and machining performance for global manufacturers across key industries.

[Learn more about OPEN MIND](#)

SCHUNK is a global leader in toolholding, workholding, gripping, and automation, delivering productivity certainty through advanced components, engineering expertise, and industrial systems.

[Learn more about Schunk](#)

Swift Tool supplies the Pacific Northwest with cutting tools, abrasives, fluids, and more, offering custom grinding, PVD coating, laser marking, and tooling support—all backed by decades of quality service since 1961.

[Learn more about Swift Tool](#)

system 3R

System 3R, founded in 1967, is a global leader in tooling and automation solutions for precision manufacturing, delivering pallet systems, robotics, and software from its Swedish development base to customers worldwide.

[Learn more about System 3R](#)

UNITED MACHINING provides integrated milling, EDM, laser, and additive solutions with advanced automation and intuitive control, enabling clean, efficient innovation for precision manufacturing.

[Learn more about United Machining](#)

Vericut, based in Irvine, CA, delivers industry-leading NC/CNC simulation and optimization software, helping manufacturers detect errors, simulate automation, and improve efficiency worldwide.
